Project: City Of Carson City Hall remodel

Scope of Work

Install (N) Electrical circuits as per the plans received from GMBI at all new cubicles being installed at the West, East and North wings. This proposal is to connect all circuits to the existing electrical panels and circuitry.

All new electrical feeding the cubicles will be run within the (E) underfloor Electrical/Data duct system and a (N) 1/2" flexible whip supplied by GMBI will be connected to the (E) duct system by installing a seal tight 90 Degree elbow.

Final connections to the cubicles will be performed by GMBI installers.

All permits and fees to be obtained by this contractor and re-imbursed by the city if needed.

Default Group

	Quantity	Material Cost	Labor Cost and/or Adjustments	Total Cost
(N) 120V Circuit in (E) In Floor Duct	59 ea	\$ 447.06	\$ 432.35	\$ 51,885.29
