 MFG Date: 04/02/08

Dolphin

Tested \$ Everything works 100%  
 I recommended they keep their controller charged, if was  
 dead upon arrival

Del Amo

Board 1 needs: power pulled to it  
 needs (2) 24.25 v Power supplies, \$ 2 new wiring harness from  
 Radio Shack to the circuit board

Del Amo Continued

Board 2

needs communication. the old com wires are missing somewhere  
 they have been cut off, the customer wants either a wireless  
 retrofit or a new board if a retro isn't possible.
