August 9, 2021

Honorable Mayor and City Council  
via City Manager Sharon Landers  
City of Carson  
701 E. Carson Street  
Carson, CA 90745

Honorable Mayor, City Council, and Ms. Landers:

This Report is submitted pursuant to our contract with the City to perform a revenue and cost analysis and to develop a computerized cost distribution and cost control system for the City for its services.

The motivation for this study is the need of both the City Council and City staff to maintain City's services at a level commensurate with the standards previously set by the City Council, and to maintain effective policy and management control of City services.

This Report provides currently useful information about the City's status on recovery of costs for City services. In addition, it will assist in projecting and determining the future level and equity of these City services.

RCS wishes to thank City staff for their assistance and cooperation extended to us during the accomplishment of our work, without whose aid this Report could not have been produced. The response, awareness and information gathered and supplied by numerous City employees make this Report the sound one we believe it to be.

We also believe that your constituents will appreciate your subjecting the City's operations to business costing methodologies, and your willingness to be informed of the true and full costs of those services which you have decided the City should provide its citizens.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Eric Johnson', with a stylized flourish at the end.

ERIC JOHNSON  
President

A handwritten signature in black ink, appearing to read 'Chu Thai', with a long horizontal flourish extending to the right.

CHU THAI  
Vice President

## EXECUTIVE SUMMARY

---

The City of Carson selected Revenue and Cost Specialists (RCS) to perform a comprehensive and detailed analysis of the City's fee-based services. Due to the various demands made of the City, it is essential that the City Council and management have complete information upon which to assess fees charged to the public for services provided as well as alternate, and more equitable, ways to finance City services provided to the community.

Based on data presented in this report, the City Council can better respond to the limits on tax revenues available to the City as well as the constant demand for higher and more operational services and capital improvements. Due to demands made of the City, it is essential that the Council and City management have additional information upon which to assist in charting a future financial course that will preserve the quality of life which its citizens have come to expect.

Systematic and Documented Approach. This analysis was designed to provide the City with a systematic and documented approach to understand, control, and recapture the costs which are forced on it by normal service demands, growth and general economic inflation.

Constitutional Methodology. The methodology used for this analysis is the "costs reasonably borne" test established by Section 8(c) of Proposition 4, now Article XIII B of the California Constitution. In following that process, RCS has analyzed the ways in which City services can be financed more equitably to assure the City's future financial viability.

Full Business Costs Determined. The methodology followed by both the Authors of Proposition 4, and consequently by RCS, determines the full business cost of providing the reported City services. It also identifies the beneficiaries of those services and determines if they are paying in relationship to benefits derived or if they are deserving of a subsidy paid from the taxes paid by all local citizens and businesses. Thus, the City Council will have full knowledge of costs which are actually occurring.

Financial Integrity Established. This report summarizes the work accomplished and presents recommendations. These recommendations, if implemented, would establish the financial integrity of the analyzed City services and would establish a continuing cost control system following the business principles which are generally espoused for government, but often are ignored in application.

## **Identifying Service Centers**

There are three basic steps in the process used by RCS. The first step is to identify the services offered by the City. Next, the service costs are calculated. Finally, the revenue currently received is matched to the cost of providing the service to determine if there is a subsidy from taxes.

Refinement Process. In a series of meetings held with City staff, department by department, we developed a list of services, and then allocated staff time to the appropriate services. This service time was refined over the course of these meetings until all available staff time was allocated and represented an accurate allocation.

## **Personal Choice versus Community Supported Services**

Personal Choice Services are those offered to identifiable customers at a measured level. They are also services that can be withheld for non-payment. These services are not precisely likened to fee-based services to the extent that policy makers may have decided to subsidize them in full or part. Examples of Personal Choice services are Building Permits, Planning applications, and Business License Processing. These services are distinguished from Community Supported Services that carry an implicit requirement and rationale for setting a level of subsidization typically based on social, safety or general community welfare. Examples of Community Supported services are Police, Fire, Street Maintenance, and Park Maintenance.

## **Summary of Results**

If all the recommendations and suggestions made in this Report are adopted, the City would increase cost recovery by **\$903,900** on an annual basis. By taking such actions, far more equity between taxpayers and fee-payers would be gained, and the City's financial picture would be improved.

## **Policy Review Information**

As the Council conducts its policy review of each of the revenue-cost match-ups, it should refer to Appendix A and also to the text in Chapter IV to assist in that review.

The policy review should assess the tax revenues used to subsidize each service and address the following options available to the City for each service center:

1. Reduce costs and thereby the tax subsidy by reducing the level of service or restructuring the service to provide it differently.
2. Adjust or institute a fee or charge to recover all of the "costs reasonably borne".
3. Eliminate a tax subsidy to another "less deserving" service to utilize the taxes in order to provide this service.

## **Result of Acceptance of Fee Suggestions**

If the suggestions in Chapter IV and in the fee recommendations in Appendix A are adopted in full then \$905,900 of added revenues will be available to the City, which would provide taxpayer equity. Most of these new revenues will be from fee increases to replace tax monies used to make up the difference between fees collected and costs incurred in providing the services, which will then be available for those services which can only be funded from taxes.

These tax "diversions" are the now-documented tax subsidies to potentially self-supporting City services. Thus, additional monies could be made available for police services, infrastructure maintenance, and other City services which are not generally conducive to service charges, thereby achieving much closer equity between benefits and associated payments.

Policy Guidance. More importantly, the Council would be able to make its decisions based on business principles as much as is possible.

Understanding of Equitable Charging for Government. The City Council now has to assist its constituents to understand that under the California Constitution the intent is that:

- Taxes finance services for which there is no alternative way to finance them.
- Service charges should be utilized to finance those things for which benefits can be determined.
- Beneficiaries of such services be charged in direct relationship to the benefits derived.

# CHAPTER I

## BACKGROUND OF STUDY

---

The City of Carson selected Revenue and Cost Specialists (RCS) to perform a comprehensive and detailed analysis of the City's fee-based services. Due to the various demands made of the City, it is essential that the City Council and management have complete information upon which to assess fees charged to the public for services provided as well as alternate, and more equitable, ways to finance City services provided to the community.

Based on data presented in this report, the City Council can better respond to the limits on tax revenues available to the City as well as the constant demand for higher and more operational services and capital improvements. Due to demands made of the City, it is essential that the Council and City management have additional information upon which to assist in charting future financial course that will preserve the quality of life which its citizens have come to expect.

Systematic and Documented Approach. This analysis was designed to provide the City with a systematic and documented approach to understand, control, and recapture the costs which are incurred as a result of normal service demands, growth and general economic inflation.

Constitutional Methodology. The methodology used for this analysis is the "costs reasonably borne" test established by Section 8(c) of Proposition 4, now Article XIII B of the California Constitution. In following that process, RCS has analyzed the ways in which City services can be financed more equitably to assure the City's future financial viability.

Full Business Costs Determined. The methodology followed by both the Authors of Proposition 4, and consequently by RCS, determines the full business cost of providing the reported City services. It also identifies the beneficiaries of those services. With this knowledge, the City Council is able to make informed decisions about the fees associated with these service costs.

### **Financing Adjustments Pursuant to Proposition 4**

Proposition 4, which is more commonly referred to as the "Gann Spirit of 13 'Let's Finish the Job' Initiative", was adopted by 74.3% of the voters of California on November 6, 1979. It became effective on July 1, 1980, retroactive to Fiscal Year 1978-1979. Statutes clarifying certain provisions of the Proposition, which is now Article XIII B of the California

---

Constitution, became effective January 1, 1981.

This report provides data to the City for reviewing the reported fee-financed services based on full-costing information and for implementing the "costs reasonably borne" provision of this Constitutional Article, within presently known legal parameters and the authors' pronounced and published intent.

Adjustments to Financing. As a result of this analysis, the City now possesses the basis for making adjustments to its methods of financing services for those services reported on herein. It can achieve a more equitable and fair mix for financing those services and capital needs, using taxes and service charges, in the direction pointed by passage of Article XIII B, and the business methodologies inherent in that Article.

The "Costs Reasonably Borne" Test. The "costs reasonably borne" process as envisioned by the Authors of Proposition 4 implies a direct relationship between payment of fees and charges and receipt of services. It also implies the use of taxes for financing those governmental activities which humanely and properly cannot be financed other than by taxes.

### **Desirability of Direct Relationship between Payment and Service**

A major underlying goal of this project is to provide information and guidance to the Council on how the City can continue as a viable financial entity, finance the services and facilities that its citizens and business enterprises have come to expect, and yet in the long run be able to live within the limits imposed by Article XIII B and Propositions 13 and 218.

At the same time, the City can in great part re-establish basic fairness and equity between users of City services and those who pay for them and control those costs on a continuing basis.

### **Impact of Propositions 4, 13, 26, and 218**

Initiative 4 of November 1979, coupled with its immediate predecessor -- Proposition 13 of a year earlier -- wrought the greatest changes in California governmental financing in a century. Proposition 218, passed in 1996 and becoming Articles XIII C & D, further limited local governments' revenue source options. Those propositions have had, and will continue to have, a profound effect on California governments.

Effects on the City. One effect of these propositions has been a constant search for new revenue sources to finance services required by the City. However, at the same time, State and Federal program revenues continue to decrease. Consequently, the City faces the

prospect of declining revenue with which to fund City services.

Costs Exceeding Revenues. The full costs of delivering the City's defined fee-financed services -- as defined in business terms by the authors of Article XIII B, and as applied by the business methods of this analysis as based on that Constitutional Article -- are running at an annual rate beyond current or expected fee revenues. The result is the diversion of tax monies to make up the difference between fee revenues collected and full business costs incurred.

Variety of Equitable Revenue Sources. This analysis presents a wide variety of ways in which revenue can legally be raised and as important, more equitably raised than at present. The amount of new revenues to be raised is dependent upon the Council's determination of the level of support for essential services.

Proposition 26. With the passage of Proposition 26 in 2010, the voters of California put limits on fees for which there is no direct benefit provided to the fee payer. This proposition also contains numerous exemptions, therefore, there are no fees or proposed fees included in this report which come under the limitations of Proposition 26.

## **Text Topics**

The remaining Chapters of this text address the following topics:

- II. Identifying and Costing Service Centers
- III. Overview of Service Revenues Matched Against Costs
- IV. Service Revenue Recommendations
- V. Conclusion

## CHAPTER II

### IDENTIFYING AND COSTING SERVICE CENTERS

---

There are three basic steps in the process used by RCS. The first step is to identify the services offered by the City. Next, the service costs are calculated. Finally, the revenue currently received is matched to the cost of providing the service to determine if there is a subsidy from taxes. This chapter covers the first two steps and Chapter III shows the match-up of revenues and costs.

#### **Identifying Service Centers**

Two techniques were utilized to identify the service centers for which revenue and cost data were gathered and around which the service cost analysis of this Report is built.

#### Revenue Analysis

The first technique involved gathering revenue information for the past fiscal year, and then updating and revising the budget estimates for the same revenue sources for the fiscal year during which the analysis was performed by RCS.

Budgets and Financial Reports Used. The Budget for the current fiscal year was secured and analyzed. Budgeted and received revenues for all fee-supported services were extracted from those reports, where such information was available.

Division of Revenue Sources. RCS has divided services into far smaller "service centers" than the City has traditionally designated.

#### Service Center Identification

The second technique involved several scheduled meetings with City staff to identify each type of service being provided with or without charge.

Refinement Process. In a series of meetings held with City staff, department by department, we developed a list of services, and then allocated staff time to the appropriate services. This service time was refined over the course of these meetings until all available staff time was allocated and represented an accurate allocation.

## **Resultant Service Centers**

"Service Center" Defined. The "service revenue" -- fee or charge for a service -- and the related "service cost" comprise a "service center". Each service center has a unique "Revenue and Cost Summary Worksheet" and a matching "Cost Detail Worksheet", which are found in Appendix B of this Report. These "Service Center Worksheets" are matched to one another on facing pages.

## **Constitutional Basis for Cost of Services**

The costs determined by RCS for the various service centers are based on the definitions of "costs reasonably borne" as utilized in Article XIII B (Proposition 4) and as further defined by its Authors in their background documents. The Authors of Proposition 4 intended their full business costing definitions to be used by California governments. Thus, the City can know and control its costs, using those Constitutionally-set business principles and legally set elements and definitions of "costs reasonably borne".

Listing of Detailed Full Business Cost Definitions. Thus, the following are put forward by the Authors as the accepted elements of "costs reasonably borne":

1. Labor costs.
2. Employee benefit costs.
3. Operational services and supply expenses.
4. Overhead expense.
5. Administrative costs.
6. Start-up costs.
7. Future capital expenses.
8. Capital replacement expense.
9. Costs of expansion of services.
10. Repayment of debt.

Authors' Background. The authors used such business definitions and elements of "cost" as quoted herein. They represented several known business organizations:

- The California Taxpayers Association
- The California Chamber of Commerce
- The National Tax Limitation Committee
- The California Association of Realtors

In effect, the pillars of California business and their thinking were represented, and their ideas were adopted overwhelmingly by the electorate of California at referendum. Thus, by

definition, the premises of this report process have a California electoral mandate.

Principle Involved. A basic principle involved in this report was the recognition of those full business costs as used and as defined by the authors of the Constitutional amendment.

### **Types of Costs**

The following costs, identified above as part of "costs reasonably borne" by the Authors of Proposition 4, make up the cost detail found on the right-hand page in Appendix B for each service center.

#### Salaries and Wages

City government is in fact a service industry, and therefore, it is natural that salaries make up the largest single element of cost for most services.

Interview Process. In order to allocate the salaries, lengthy interviews were held, documents sought and researched, and reports and accounting records examined by RCS. The result was a percentage or hours distribution of individual employee personal services costs.

One hundred percent of the time of all City employees was distributed across the applicable service centers. This study did not provide operational assessments or recommendations for improvements to services.

#### Employee Fringe Benefits

Since fractional time -- to as low as three minutes per unit of service or one-twentieth of a percent of the annual time of an employee has been allocated to service centers, fringe benefit costs also must be fractionalized to carefully and accurately distribute those ancillary personnel costs.

The City finances numerous benefits for its employees, thereby incurring measurable costs for these items, including:

- Retirement
- Health Benefits
- Medicare
- Life Insurance
- Deferred Compensation

All of these costs are current operating expenses, and the amounts were isolated. Actual

costs were determined and reduced to a percentage of salary for each of the positions.

Available Work-Hours. After the individual elements of cost for positions was compiled, the total cost for each position was divided by the number of available work-hours. Available work hours were calculated as the total possible work-hours in a year, 2,080, less the following away-from-work benefit hours:

- Holidays
- Vacations
- Personal Leave
- Sick Leave
- Morning/Afternoon Breaks
- Start Up/Down Time

### Maintenance and Operation Costs

All maintenance and operation costs, including non-personnel expenses such as professional services, insurance, operating supplies etc., were derived from the current year Council-approved budget and allocated via percentages or through actual allocation to each of the service centers identified in a department or division.

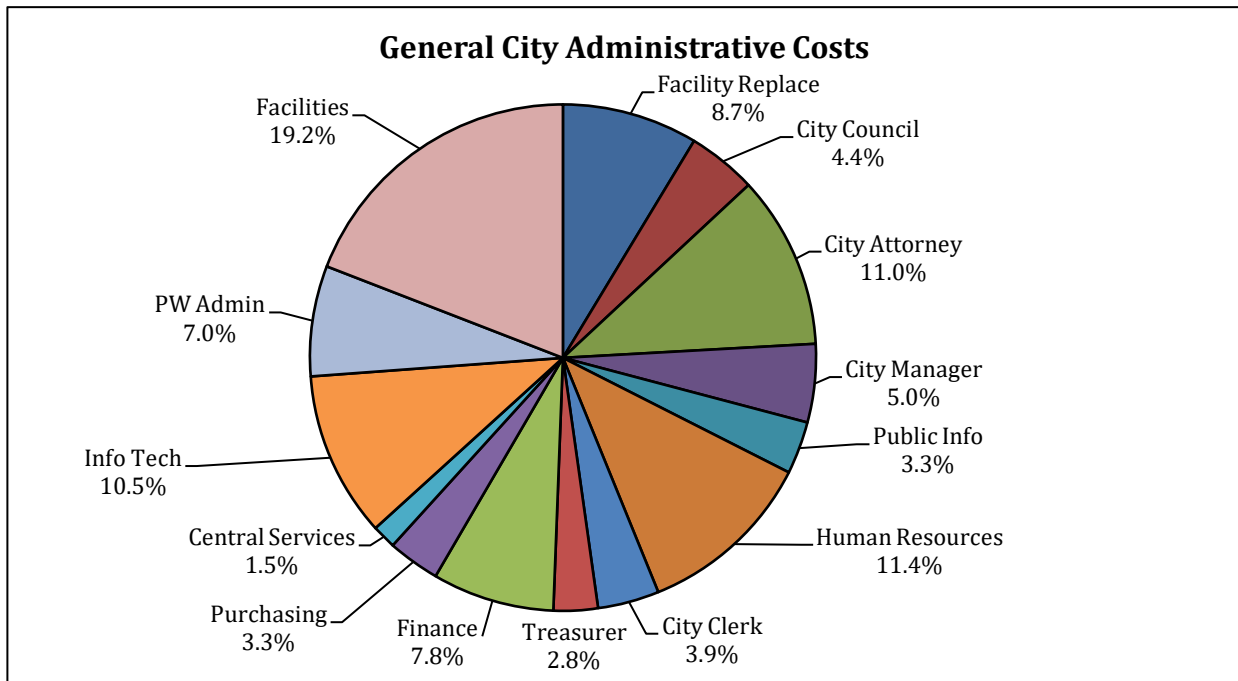

### General and Departmental Overhead Costs

Overhead costs provide the vital glue that holds an organization together operationally and provide important coordinating capabilities. They also provide the day-to-day support services and facilities required for the organization to function effectively. RCS has calculated a detailed Cost Allocation Plan (CAP) to identify and allocate these costs to the remainder of the City organization. In the CAP, costs were allocated to end-user departments and divisions by applying an agreed-upon overhead allocation factor. Each factor was related to the work effort of its particular overhead element and was assessed for relevance and reasonableness.

Full Cost Distribution. The purpose of deriving overhead costs to apportion these amounts to direct service program costs. By adopting this method, the City will be aware of its true costs and be able to emulate business methods. Article XIIIB's (Proposition 4 of 1979) authors intended this, defining as part of "costs reasonably borne" a calculated "reasonable allocation for overhead and administration."

General City Overhead. These services primarily set policy and support other departments without providing a deliverable service to the public. Where they do perform an end-user service, such costs have not been allocated to other departments.

Costs in this general administration category City-wide include the following functions:

Departmental Administration. Costs in this category involve intra-departmental support functions, outside the above listed general City overhead functions, and involve the allocation of staff time within and among departmental functions. These services also do not provide end-user deliverables to the public, but instead provide vital administrative support within specific departments.

### Fully Allocated Hourly Rates

All of the above items make up the fully allocated hourly rate which is calculated for each position in the City. The makeup of each component of the Department-wide average fully allocated hourly rate is detailed in the chart below.

## CHAPTER III

### OVERVIEW OF SERVICE REVENUES MATCHED AGAINST COSTS

In the last chapter the method of calculating the costs for all City services was identified. This chapter begins with a Summary that itemizes the revenues and costs by service center. Then, an overview is presented of what will be presented in the following chapter, which shows that there is no one solution to the City's financial challenge.

#### Accounting for All Revenues – Fees and Taxes

Local government funding comes from a multitude of revenue sources such as taxes, fines, grants, use of property, user fees, utility rates, etc. Our Study focuses on the relationship between fees and taxes. As an example, Conditional Use Permit (S-001) in the following schedule estimates the full costs at \$167,188. These expenses are offset by current fee revenues of \$72,000, and tax revenues of \$95,188 must pay for the remaining. This subsidy can be eliminated by raising the relevant fees. To the extent that the fees are NOT increased, general City taxes paid by all taxpayers are the only alternative revenue source.

### Personal Choice versus Community Supported Services

Personal Choice Services are those offered to identifiable customers at a measured level. They are also services that can be withheld for non-payment. These services are not precisely likened to fee-based services to the extent that policy makers may have decided to subsidize them in full or part. Examples of Personal Choice services are Building Permits, Planning applications, and Business License Processing. These services are distinguished from Community Supported Services that carry an implicit requirement and rationale for setting a level of subsidization typically based on social, safety or general community welfare. Examples of Community Supported services are Police, Fire, Street Maintenance, and Park Maintenance.

As the voter initiative most concerned with fee services, the initiative authors of Proposition 4 were not concerned with what categories of services were being subsidized as long as subsidy levels set by policy were explicit decisions made by the authorizing body with knowledge of full cost information.

### Policy Review Information

As the Council conducts its policy review of each of the revenue-cost match-ups in the next chapter, it should refer to comments on the bottom of the service center worksheets in Appendix B and also in the text in the next chapter to assist in that review.

The policy review should assess the tax revenues used to subsidize each service and address the following options available to the City for each service center:

1. Reduce costs and thereby the tax subsidy by reducing the level of service or restructuring the service to provide it differently.
2. Adjust or institute a fee or charge to recover all of the "costs reasonably borne".
3. Eliminate a tax subsidy to another "less deserving" service to utilize the taxes in order to provide this service.

Effects of Budget Reductions. Across-the-board budget reductions during recessionary times affect fee-supported services as well as tax-supported services. But, if staffing reductions cause the service to be provided at a level that is lower than previously, then the costs have also decreased from that previous level. This must result in a lower fee so as not to be charging more than the costs reasonably borne. Therefore, the City should be aware of this result when reviewing possible budget reductions.

### **Result of Acceptance of Fee Suggestions**

If the suggestions in the following Chapter and on the Service Center Worksheets are adopted in full then a significant amount of added revenues will be available to the City, which would provide taxpayer equity. Most of these new revenues will be from fee increases to replace tax monies used to make up the difference between fees collected and costs incurred in providing the services, which will then be available for those services which can only be funded from taxes.

These tax "diversions" are the now-documented tax subsidies to potentially self-supporting City services. Thus, additional monies could be made available for other City services which are not generally conducive to service charges, thereby achieving much closer equity between benefits and associated payments.

Policy Guidance. More importantly, the Council would be able to make its decisions based on business principles as much as is possible.

Understanding of Equitable Charging for Government. The City Council now has to assist its constituents to understand that under the California Constitution the intent is:

- That taxes finance those services for which there is no other alternative way to finance them.
- That service charges and special assessments should be utilized to finance those things for which benefits can be determined.
- That the beneficiaries of such services be charged in direct relationship to the benefits derived.

Then there no longer will be a feeling that the old definitional saw of "a good tax" being "the one which you pay and from which I get the benefits" exists in the City.

## CHAPTER IV

### SERVICE REVENUE RECOMMENDATIONS

---

The purpose of this Chapter is to present the services which RCS has initially labeled as Personal Choice and to suggest the magnitude of tax revenues that could be diverted from these services to Community Supported Services.

City Council has Final Judgment. RCS has used its experience with other public agencies to suggest what services were Personal Choice as opposed to Community Supported Services and in suggesting that most Personal Choice Services should be paid for by the service requestor rather than subsidized by the entire community. However, the final decision on the nature of the service and whether it warrants being subsidized will have to be made by the City Council.

#### Service Groups

RCS has organized Personal Choice Services into the following five service groups for purposes of discussion:

- Community Development Services
- Public Safety Services
- Leisure & Cultural Services
- Transportation Services
- Administrative Services

These groups, explained in turn, are program oriented. Each group includes a table summarizing the revenues and costs of each service. The table summarizing the group tables (Table 6) is found at the end of this Chapter.

**Appendix A**, following the text, summarizes the current fees and the proposed fees for each of the Personal Choice service centers

Service Center details found in **Appendix B**, are in sequence by the Reference Number (Column 1 on each of the following Tables), include detail information for each service on two facing pages. The left page has textual and summary information including RCS's suggested service fee. The right page has the service cost detail.

**General Commentary on Chapter Tables**

Each table has eight columns, explained here:

Column 1 is the Report Reference Number.

Column 2 is the title of the service.

Columns 3, 4 & 5 are the same amounts for revenue, cost and profit (subsidy) found on the left page of the detail service sheets in Appendix B.

Column 6 is the current percentage of costs recovered from the user fees and charges with the difference being subsidized by taxes.

Column 7 is the percentage of user fee cost recovery which might be obtainable without tax subsidy. Of course, decisions regarding tax subsidies to a service are a City Council policy decision on how to allocate its tax and general revenues.

Column 8 contains the estimated amount of revenues which RCS suggests could be raised or reduced.

**Community Development Services**

When basic City development services are supported by general taxes, there is little reason for taxes to also finance those Personal Choice services which mainly benefit a developer or specific property owner. Thus, the expenses distributed across these service centers are primarily the incremental additional expenses caused by community development. Were no development to take place, most of these costs could be eliminated, or at least significantly reduced.

NOTES:

- (a) Insufficient data to determine financial impact
- (b) Deposit based service/fee

City as Impartial Arbiter of Land Use. The City staff, Planning Commission, and the City Council require the processes enumerated in the above list as the price of community review, input and ultimate acceptance by neighboring properties of land development. Such municipal review is required by State law, assigning the role of impartial arbiter of land use decisions to local government.

While it would be grossly unfair, and probably foolhardy and expensive as well, to totally deny all development, some cities have chosen this course. The City is by law put into the unenviable position of being the impartial arbiter; a referee over development. Therefore, it

seems logical that the development industry bears the full cost of the services to regulate its development; not more than cost, nor less than cost, but only full cost recovery through fees charged.

**Building Plan Check & Inspection (S-053):** Currently, Building & Safety services are provided by Los Angeles County and the fees charged are the County's fees. But while the County bills the City the actual hours spent, the fees are based mostly on the project valuation. This has led to a surplus of revenues over costs for the City. Therefore, it is recommended that the City charge a percentage of the County fee to lower the fee charged. Since Building revenues are variable over time due to the building cycle and the volume of projects, it is recommended that the City attenuate that decrease so as not to be in a position of having to raise fees in the future because they were lowered too much now. The current City fee has a 1.6 multiplier to capture the City costs. Therefore, the City should lower this multiplier to 1.25 now and reassess the cost recovery level annually.

### **Conclusion of Community Development Services**

If the suggestions made in Appendix A are approved, approximately \$116,900 in new revenue could be realized annually, and there would be a rebalancing of Planning and Building fees.

**Public Safety Services**

These service centers are identified for those who use the City public safety services disproportionately from others.

**Table 2  
Public Safety Services**

REF # (1)	SERVICE (2)	TOTAL FEE REVENUE (3)	TOTAL SERVICE COST (4)	TOTAL PROFIT/ (SUBSIDY) (5)	PCT. RECOVERY FROM FEES		POSSIBLE NEW REVENUE (8)

NOTES:

(d) Fees are market sensitive

**Conclusion of Public Safety Services**

Consideration of the above suggestions would result in more equitable fees among the group of users of these services, and approximately \$68,400 in new revenue could be realized annually, with an estimated \$50,000 of that increase coming from increased parking fines.

**Leisure & Cultural Services**

These service centers are identified for those Leisure & Cultural services that are provided to the community.

NOTES:

(d) Fees are market sensitive

**Leisure & Cultural Services Findings**

The breakout of direct and indirect costs and cost recovery percentages can be reviewed in more detail in **Appendix C**.

As anticipated, the above findings suggest that a subsidy level exists for recreation activities – an amount that varies depending upon whether one considers direct versus indirect costs.

This report recommends that Recreation cost recovery goals be set as a percentage of Recreation Program costs. This practice is quite common in local government operations, not because indirect costs do not exist and are not important, but rather to ensure that the cost recovery goals remain relevant, market competitive, and are easily reproducible.

## **Market Considerations**

But much remains to consider in evaluating price and costing levels in this sensitive service area – considerations that are further detailed below.

By their nature, recreation services are highly market driven and subject to a variety of external factors including value to the City’s character, consumer demand, location, facility amenities, demographics, and competing service providers. Adjustments in fees can arguably have a significant impact on consumer demand given a variety of elasticity factors that may be in play. This comment does not imply that additional revenues are unavailable but makes the case that fee levels are best set at the delivery point based on a flexible and market-based pricing model. It also suggests that recreation performance levels might be best set at a macro level, rather than at the individual program level, to allow for optimal marketing and program pricing flexibility.

In pondering these cost results, the City should consider the following observations common to Recreation services.

## **General Methodology Assumptions**

The methodology generally used in developing service center revenue/cost computations, as has been done in this study, is founded on key assumptions:

First, service volumes are fairly constant and void of wide fluctuations in consumer patronage from year to year.

Second, consumers have come to accept the economic value of continuing to use the identified service at a value that equates to the cost of providing the service.

It is important to note that these two assumptions are not particularly valid for recreation type activities that are characterized by commonly noted annual changes in program popularity combined with the influence of seasonal and weather conditions. Furthermore, recreation dollars are highly sensitive to overall market and economic conditions as a service that strives to compete for an elusive discretionary income dollar.

Recreation service fees are influenced by two factors generally not an issue in the delivery of other City services - marketing and social policy.

## **Marketing**

Given that these services are highly market sensitive and financed mostly by discretionary income, a special burden is placed on program managers to innovate and promote attendance. Those who run these programs know too well the need to convince customers of the value-added features of their services. Their market is unforgiving. If fees are set too high, attendance and consequently revenues will drop. On the other hand, establishing fee levels artificially low will result in a flood of demand beyond resource capabilities.

## **Pricing**

If priced strictly at average cost, fee increases can result in reduced participation leading to additional reactionary price increases and further losses in patronage. As such, prices for recreation services must be set carefully. The potential number of target customers should be estimated as part of an aggressive program marketing those services at determined price levels. Some important considerations in setting pricing follow:

- Has a marketing study been performed?
- Have programs been selected for their popularity?
- Do City programs compete with offerings made by other agencies, organizations, or private businesses that can supply the program at less cost?
- Is there a less costly way for the City to supply the service?
- Has sufficient money been budgeted to advertise the program adequately and how is the number of participants affected by the level of advertising?
- What costs would NOT be incurred or REMAIN were the program not to be offered?
- What is the cost of adding one more participant; of opening one more section of the activity?
- Are participants polled for their reaction to the offering, the instructor, the facility, and for their ideas for possible programs and the amounts that they are willing to pay?

- Are some facilities more costly to operate than others? What are the costs of electricity, water, gas, janitorial, maintenance, telephone, vandalism, and the like for each facility?
- How do existing facilities compare to those provided by the competition in creating either a price advantage or disadvantage?
- Has the clientele of the activity been defined allowing the City to understand the social purpose in subsidizing the activity?

A number of these issues have already been addressed by City staff and are merely presented to illustrate the issues involved in operating such services.

In determining what should be charged for services it ultimately is the responsibility of recreation professionals to recommend a combination of decreased costs, increased participation and fee adjustments needed to meet the degree of recovery that is ultimately determined by City Council.

### **What Can Be Charged?**

In so far as Recreation services are market driven by definition, they are not subject to the cost limitations of Proposition 4. As such, pricing for class programs and related facility rentals can be set at market rate and consumer valued pricing levels subject to policy defined discount and subsidy levels.

### **Social Policy**

The City Council should develop a conscious policy as to what programs should be subsidized with tax monies in promoting social benefit, and to what extent. It may well be that some level of subsidy for many of the services identified in this group is not only necessary, but also appropriate. If that is deemed to be the case, subsidy levels can be set as part of a budgetary or programmatic policy statement. These policy statements can also explicitly describe the social reasoning involved in the decision-making process.

Discounts & Exemptions: The provision of scholarships and exemptions to disadvantaged youths and seniors is a viable and appropriate alternative to reducing fees to the entire community and should be considered in the fee setting process.

### **Conclusion of Recreation Services**

City staff and the City Council may wish to consider reviewing the marketing criteria set out earlier in this Chapter and review the cost figures provided herein. It may well be the case that additional revenues can be generated if the marketplace permits it. In setting fiscal goals for such services, it is recommended that financial targets be established at the macro (Division or Major Program Level) level to allow for maximum price adaptability at the minor program and class level. That being said, monitoring and reporting performance at the targeted level is critical in assessing class/program viability as a bias for properly allocating resources to the most financially and socially productive activities.

### Transportation Services

These service centers are identified for Transit services.

**Table 4  
Transportation Services**

NOTES:

- (c) Fee restricted by Law
- (e) Deletion of service/fee

**Conclusion of Administrative Services**

If the suggestions made concerning the service centers grouped here are implemented, there would be increase in the new business registration fees. These fees are separate from the business tax.

**Summary of Personal Choice Services**

The following Table 6 summarizes the recommendations and suggestions made in this Chapter.

**Table 6  
Summary**

SERVICE (2)	TOTAL FEE REVENUE (3)	TOTAL SERVICE COST (4)	TOTAL PROFIT/ (SUBSIDY) (5)	PCT. RECOVERY FROM FEES		POSSIBLE NEW REVENUE (8)
				ACTUAL (6)	SUGGEST (7)	
COMMUNITY DEVELOPMENT	\$5,858,782	\$5,566,800	\$291,982	105.2%	VAR.	\$116,900
PUBLIC SAFETY	\$1,057,000	\$813,220	\$243,780	130.0%	VAR.	\$56,400
LEISURE & CULTURAL	\$3,331,360	\$21,612,457	(\$18,281,097)	15.4%	VAR.	\$0
TRANSIT	\$2,722,710	\$3,539,566	(\$816,856)	76.9%	VAR.	\$17,000
ADMINISTRATIVE	\$953,386	\$1,707,944	(\$754,558)	55.8%	VAR.	\$713,600
	<u>\$13,923,238</u>	<u>\$33,239,987</u>	<u>(\$19,316,749)</u>	<u>41.9%</u>		<u>\$903,900</u>

If all the recommendations and suggestions made in this Chapter and in Appendix A are adopted, the City would raise \$903,900 on an annual basis.

Taxpayer Equity Achieved. By taking such positive actions, the City’s financial picture would be improved, far more equity between taxpayers and fee-payers could be gained, and fairness between property-related and non-property-related services could be secured.

The above table shows that the City is subsidizing \$19,316,749 of Personal Choice Services with City tax dollars. Should the City Council feel that tax dollars are insufficient, or use for different purposes, this chapter has shown that there are opportunities to either increase the user fees or lower the cost of Personal Choice Services.

**A Master Fee Resolution**

RCS recommends that the City adopt a Master Fee Resolution which the Finance Department updates and the City Council adopts annually. RCS will work with Finance to help implement this Resolution.

RCS also recommends that the City Council adopt a policy of not starting any new service without a cost analysis, using the costing approach utilized in this Report, so as to determine ways in which the service could be fee-financed, if at all possible. This approach could be used when considering new parks or public buildings, improved police protection, or any other desired function or service.

RCS is available to discuss the process and results with the City Council. In addition, we can share our experience of doing this for over two hundred cities as the City Council determines what action to take.

**THIS PAGE INTENTIONALLY BLANK**

## CHAPTER V

### CONCLUSION

---

#### **Elimination of Subsidies**

This Report recommends that unintentional tax subsidies be eliminated. Service users thus can vote with their dollars and not use a service for which they are unwilling or unable to pay. Hidden subsidies, which have existed for many of the City's services, can now be re-evaluated.

#### **Issues Involved**

The basic issue involved in viewing the results of the analysis presented by this text is to what degree fees should be expected to support the costs of the services.

Or viewed another way, to what extent should general taxes be utilized to subsidize the difference between the costs of each service center and the revenue produced from fees paid by the user of that service'?

Pressure on Tax Money Use. The opposite side of this issue is the increasing pressure on the use of public tax monies. Tax monies have severely decreased for local government in California. If fees do not pay all costs, then taxes must make up the differences not paid for by fees generated by users of specific services, or those services may need to be eliminated.

#### **Addressing of Issues by City Council**

The City Council should address the principles and issues enumerated herein to determine where, and to what extent, taxes will be utilized to cover costs incurred in the provision of special services. This is the current nature of competition between deserving public services for the scarce tax dollar. Who gets the dollars -- Police or Public Works? City streets or persons wanting zone changes? Code Enforcement or Library? This is the nature of the tough policy questions involved in being an elected official in local government today.

Specific Policy Alternatives to Be Answered. Once the above cost issues are determined then the City Council has four policy alternatives available as to the revenue/cost mix of each service center:

- Continue any tax subsidy which might be found.
- Eliminate the tax subsidy by increasing fees to cover all "costs reasonably borne".
- Reduce costs by reducing the level of service.
- Decide on an appropriate level of tax subsidy, being aware that taxes are now limited in rate, base and, consequently, in amounts yielded and available.

## **Conclusion**

The City has appropriately responded to the mandate and spirit of Proposition 4. It is utilizing the passage of Propositions 4, 13 and 218 and the attention given to them as an opportunity to review its financial structure and philosophy, and to institute a cost control system, tailored to the City's needs, to supplement its governmental accounting and budgeting systems.

The cooperation, excellent support and data provided in accomplishment of the work reported herein speaks well of the way in which a City organization can adapt to the so-called "new realities" of California governmental finance.
