Enterprise System: An Enterprise System, as defined by SB 272, is a software application or computer system that collects, stores, exchanges, and analyzes information an agency uses that is both of the following:

- A multi-departmental system or a system that contains information collected about the public
- A system that serves as a 'system of record' or an original source of data within an agency

Requirements:

- 1. Create a catalog of enterprise systems containing:
 - Current system vendor
 - Current system product
 - o System's purpose
 - o Description of categories or types of data
 - Department that is the prime custodian of the data
 - Frequency that system data is collected
 - Frequency that system data is updated
- 2. To make the catalog publicly available upon request
- 3. To post the catalog in a prominent location on the agency's website
