

DRAFT

Proposed Calas Park Supplemental Environmental Project Fact Sheet

- Proposed \$5.98 million project to capture and infiltrate 13.8 acre-feet of stormwater annually at Calas Park.
- Project Benefits –
 - Improve water quality (reduce bacteria, metals)
 - Provide water to irrigate park
 - Signage to educate the public about stormwater pollution prevention
- Sanitation Districts will pay for project as settlement of an enforcement action for wastewater spill in Carson on Dec. 30, 2021.
- Penalty would otherwise go to the State Water Board.
- State has strict requirements for projects that can be approved and timelines for project completion.
- Next steps: Regional Water Board will circulate settlement Order for public comment (30 days); after close of comment period, they will either issue Order administratively or propose consideration at a regular hearing.
- 30 days from issuance of final Order, City, San Districts & bank must enter into escrow agreement and project begins.
- Project must be completed in 48 months.
