

Safe Rooms – Recreation Facilities

Anderson Park – Restroom in lobby. 1 entry door. Currently no lock but request will be done for a lock. Women's restroom looks similar and is potential to use as well.

Calas Park – restroom and small lobby in front of restrooms. 2 doors (one outside and one to activity room)

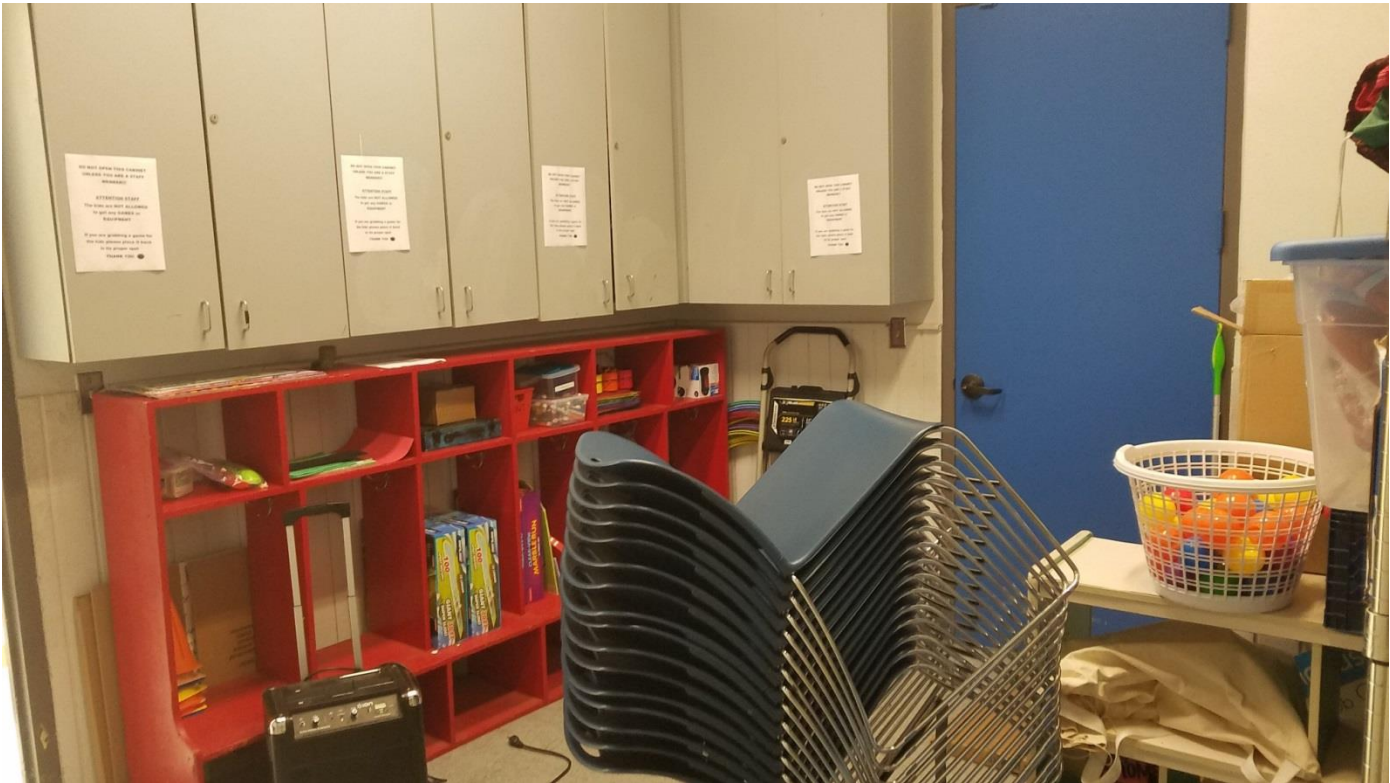

Carriage Crest – Kitchen in activity room. One door and roll door to activity room

Carson Park – one or both interior restrooms. One door each

Del Amo – Closet located at SW corner of large activity room. One door to activity room and one door to hallway.

Dolphin – Kitchen in activity room – 2 doors and one roll down door.

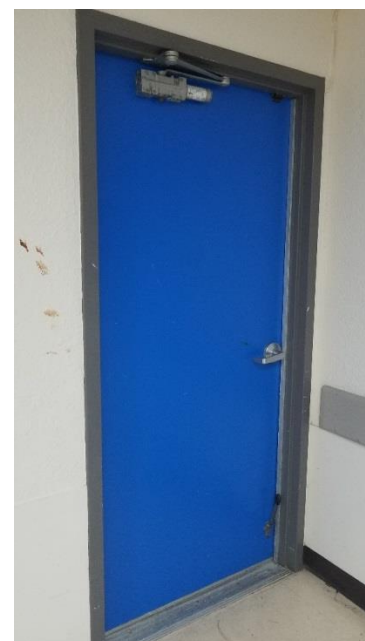

Dominguez – Interior men's restroom. One door to outside, one door to lobby of building, and another door just inside the door from lobby. All of those doors can lock, so added security of extra interior door. Would likely just add extra security to the doors leading to lobby and outside.

Hemingway Park – Small activity room. Double doors to patio, single door to activity room, and single door outside.

Mills – Small activity room. Has windows facing park, but windows have locked security screens. One door to outside and double door (on right side of picture) to activity room.

Scott Park/Boxing Center – Boxing Center – double doors to lobby and one door to outside

Stevenson – Storage room in gym.* One roll up door from inside gym and one door to outside. Roll up door is electric.

* There are 3 sets of double doors in gym, two that lead outside and have no handles on outside, and one that leads to lobby. Lobby doors have small windows. The gym could be used as a preliminary “safe room”, but once doors are locked, the storage room would prove to be a more secure “safe room”.

Veterans Park – Kitchen in activity room. 1 roll door and door to activity room, 1 door to small activity room, and 1 door to outside.

SportsComplex – 1 or both locker rooms. 1 door to restroom.

Carson Pool – Side storage rom. One door that leads to hallway in building.

Dominguez Aquatic Center – Staff restroom. One door that leads to office area.

Hemingway Aquatic Center – Staff restroom. One door that leads to office.

Scott Pool – Female restroom. One door leads to office.

Note – there are other options at pools for larger areas, but these are storage areas/mechanical areas with chemicals and heavy machinery that also have double doors instead of single doors.
