3. PRICING

All Equipment, Products, or Services under this Contract will be priced at or below the price stated in Supplier's Proposal.

Line Item	Question	Response *
39	Describe any product, equipment, maintenance, or operator training programs that you offer to Sourcewell participating entities. Include details, such as whether training is standard or optional, who provides training, and any costs that apply.	Operational and safety training is standard with each delivery of machine. This is completed either by the Distributor or direct sales representative in that area at no cost to the customer. Each new Crafcro unit delivered to the end user includes up to 8 hours of on-site training and safe operation techniques for the equipment. Periodic training is available at the end user request. Crafcro provides ongoing equipment training seminars as well as web-based training and troubleshooting.
40	Describe any technological advances that your proposed products or services offer.	With over 45 years of manufacturing experience, Crafcro has been the leader in the pavement preservation equipment with advancements in safety controls with our on-demand pump system that stops the flow of sealant if the application wand is dropped, keeping the operator from getting burned from sealant splashing from the wand. The Pump Lockout system was also developed to keep the operator from trying to pump sealant before it is heated to the proper temperature and causing premature wear on the pump. New engine operation controls are being used to operate and monitor the entire unit and override operator errors. This control panel also allows the engine to run at a lower speed while heating up, once the melter is ready to start pumping, the engine speeds up to produce more power. This makes the Crafcro melters much more fuel efficient. Crafcro's engineering and designs make our crack sealing and patching equipment the safest in the marketplace.
41	Describe any "green" initiatives that relate to your company or to your products or services, and include a list of the certifying agency for each.	Crafcro utilizes Tier 4 engines which meet Emission Standards. Crafcro developed the Crack-Vac filter system for cleaning the cracks and joints in asphalt and concrete roadways and parking lots. This system contains particle matter down to ten microns (PM-10) which complies with the strict air quality standards in effect today. Crafcro also developed the Dust Control Router which eliminates occupational exposure to respirable crystalline silica and reduces dust by 96% when routing cracks and joint for sealant application. Many Crafcro sealants are blended with recycled ground tire rubber, as a company, Crafcro utilizes approximately 10 million pounds of recycled tire rubber a year. Crafcro's sealant Box packaging contains recycled cardboard and is 100% recyclable. Over the past several years Crafcro has patented 2 different boxless packages for sealant that eliminates cardboard boxes and is environmentally friendly with all waste eliminated.

Crafcro has engineers that are members of the ASTM committees that work on sealant specifications for the Country. Crafcro is also involved with several sealant test decks across the Country: National Transportation Product Evaluation Program, National Center for Asphalt Technology and the MNROADS testing facility in Minnesota. This involvement assures that Crafcro sealants are designed and manufactured to the highest quality and deliver the best performance possible for the Agency's needs. Each of the sealant manufacturing plants for Crafcro have testing labs. Every manufacturing lot of material is tested and is certified that the sealants meet the specification it was manufactured to before it is shipped to the end user. This guarantees the products quality. The Crafcro equipment plant has a very extensive AQ, QC program, that includes the run up of all pieces of equipment to assure all operational aspects of the equipment. All pieces of equipment are inspected and signed off by the QC Manager before shipment. All KM and Graco equipment will be received either at a Crafcro facility or Distributor and will be run up to make sure the equipment is in good working order and ready to be delivered to the Agency. Crafcro is the only manufacturer of equipment and materials to provide a total pavement preservation solution.
