

# Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

## RCRA Permit Renewal

For

### Phillips 66 Carson Refinery

1520 E. Sepulveda Blvd, Carson, California 90745

On April 27, 2017, the Department of Toxic Substances Control (DTSC) received a post-closure permit renewal application from Phillips 66's Carson Refinery (facility). The post-closure permit request is for the facility's former Process Water Pond. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

The former Process Water Pond previously stored both process water and oil/water sludge. Closure of the Process Water Pond was approved by DTSC in 1999.

If DTSC renews the Permit, DTSC will allow the facility to continue to post-closure monitoring and activities. The facility is located on 1520 E. Sepulveda Blvd, Carson, California. This permit would be in effect for ten years.

The full administrative record for the facility is available for review at the following two locations:

DTSC Sacramento Regional Office  
8800 Cal Center Drive  
Sacramento, California 95826  
Call (916) 255-3758 for appointment

DTSC Chatsworth Regional Office  
9211 Oakdale Avenue  
Chatsworth, CA 91331  
Call (818) 717-6500 for appointment

Documents are also available for download from the DTSC EnviroStor web site at the following link:
