**PUBLIC HEARING TO INTRODUCE ORDINANCE NO. 17-1617, AMENDING THE CARSON MUNICIPAL CODE ADOPTING BY REFERENCE THE 2017 LOS ANGELES COUNTY FIRE CODE, TITLE 32 (CITY COUNCIL)**

### I. SUMMARY

Adoption of Resolution No. 17-042 (Exhibit No. 1) will demonstrate the City Council's support of the Los Angeles County Fire Protection District and their efforts to adhere to the State of California health and safety law requirements which govern the safeguarding of life and property from fire and explosion hazards and from conditions hazardous to life or property in the occupancy of buildings and premises within the City of Carson.

Adoption of Ordinance No. 17-1716 (Exhibit No. 2) will demonstrate the City Council's compliance with California State law requiring that the City of Carson's Fire Code contain the standards that are published in the California Building Standards Code and that local codes must be operative by January 1, 2017.

## **III. ALTERNATIVES**

If no action is taken, the California Fire Code would become the operative code in the City of Carson; all previous local and County amendments would be void.

## **IV. BACKGROUND**

The attached resolution adopts the Los Angeles County Fire Protection District Fire Code as the City's Fire Code and ratifies the building standards, relating to fire and life safety, which are more restrictive than those adopted by the State Fire Marshal and contained within the California Building Standards Code. California law requires building standards adopted by local jurisdictions that are more restrictive than those adopted by the state to be enacted by ordinance within 180 days after the state adopts and publishes the California Building and Fire Code. The California Health and Safety Code Section 13869.7 authorizes the Fire District to adopt such standards but requires ratification by the legislative body where the standards will apply.

Similarly restrictive building standards are contained in the existing Fire Protection District Fire Code and have been in effect and are an integral part of the District's fire protection plan. Modifications were recently adopted on January 24, 2017 and are contained in the current Ordinance.

California Health and Safety Code Section 13869.7 requires the Fire District and each city to make and to file findings that support the need for more restrictive building standards based on local climatic, geological, or topographical conditions. Those findings from the Ordinance adopted by the Board of Supervisors are contained in Exhibit 3. The County and District Fire Code Summary of Changes are shown in Exhibit 4. It describes the changes in the 2017 County/District Fire Code from the existing 2014 Fire Code.
